

Pizza Sales Performance Analysis

A Data-Driven Approach to Menu & Order Trends – Uncovering what sells, when it sells, and where the revenue really comes from.

SQL ANALYTICS REPORT

Building the Foundation

Our analysis is powered by four interconnected database tables that capture the full lifecycle of every pizza order – from menu item to completed transaction.

Pizza_Types

The master menu – names, categories, and ingredient lists.

Pizzas

Specific variants by size with individual pricing.

Orders

Transactional metadata – date and time of each order.

Order_Details

The bridge table connecting pizzas to specific transactions.
